DIVISION OF  
OIL, GAS & MINING

Re: B.P. Minerals  
Barney's Canyon project

Dear Mr. Jones:

We appreciate your comments expressed in your 8 August 1988 letter concerning the B.P. Minerals Barney's Canyon project.

We have noted the request by your consulting engineer James M. Montgomery that water balance calculations be included as part of the monitoring program. We will discuss this with B.P. Minerals and determine the costs which would be involved in incorporating this proposal.

We understand that the mine waste dumps have been evaluated by the Division of Oil, Gas & Mining for their acid generating potential. Requirements have been specified so the sulfide waste rock disposed of will fall within the acceptable criteria, see enclosed information submitted to the Division of Oil, Gas and Mining in the notice of intent document. If your office has additional questions or concerns regarding this matter please call the Division of Oil, Gas and Mining at 538-5340.

Please call Mr. Charlie Dietz if you have any other concerns.

Sincerely,

Utah Water Pollution Control Committee

Don A. Ostler, P.E.  
Executive Secretary
